Pasay City, Metro Manila, Philippines

PROFESSIONAL SUMMARY

Software Engineer (Full-Stack Frontend Specialist) with a deep focus on the Unified Service Platform (USP), a nationwide fintech system across 186 branches. Expert in Vue.js and Vuetify for architecting high-performance UIs, with robust technical proficiency in PHP/Laravel and Node.js for full-stack production support. Proven track record of engineering revenue-generating frontend integrations for high-volume remittance, digital cash-ins, and insurance modules.

TECHNICAL SKILLS

- **Frontend Development:** Vue.js, Vuetify, React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery, Axios.
- **Backend & API:** Node.js, Express, Laravel, PHP, Java, Kotlin, RESTful APIs, Microservices.
- **Databases & Prototyping:** MySQL, SQL Server, MongoDB, Firebase, Figma.
- **Cloud & Security:** Google Cloud Platform (GCP), Key Management Service (KMS), Data Encryption.
- **Tools & Methodology:** Git, GitHub, Agile/Scrum, Sprint Workflows, Unit Testing.

PROFESSIONAL EXPERIENCE

PETNET INC.

Frontend Developer

May 2024 – Present

- Frontend contributor for the Unified Service Platform (USP), managing the UI architecture and full-stack production support for 186 branches nationwide.
- Successfully balanced high-velocity feature development with critical system maintenance across a diverse tech stack (Vue.js, Laravel, Node.js).
- (See "Key Projects" below for detailed technical contributions and impact)

KEY PROJECTS & CONTRIBUTIONS

UNIFIED SERVICE PLATFORM (USP) SYSTEM

High-Scale UI Architecture & UX

- Architected and maintained a library of reusable, responsive UI components using Vue.js and Vuetify, ensuring a seamless user experience across a nationwide deployment of 186 branches.
- Modernized the frontend ecosystem by managing concurrent development cycles between modern Vue.js modules and legacy jQuery codebases, achieving 100% feature parity during the transition.
- Optimized client-side performance and API response handling, contributing to a 80% reduction in recurring support tickets related to UI/UX friction.

FinTech Integration & Transaction Engineering

- Engineered complex frontend workflows for high-volume remittance services, including MoneyGram and Palawan Pay, ensuring secure and intuitive user paths for cash-in/out transactions.
- Developed the interface for a multi-transaction automation module for Malayan Insurance, streamlining bulk policy processing and significantly reducing manual data entry errors.
- Integrated digital payment services like Razer e-load by consuming backend microservices, ensuring real-time data synchronization and transaction state management.

Security & Frontend Integrity

- Implemented secure payload encryption on the frontend by integrating with GCP Key Management Service (KMS), protecting sensitive financial data from client-side tampering.
- Leveraged Git and Agile/Scrum methodologies to deliver high-impact frontend features within strict sprint deadlines, maintaining high code quality through rigorous version control.

System Stability & High-Velocity Issue Resolution

- Technical Troubleshooting: Managed a high-volume ticketing queue, identifying and resolving critical frontend and backend bottlenecks across Vue.js, Node.js, and Laravel environments.
- Support Ticket Reduction: Orchestrated a series of comprehensive bug fixes and system updates that achieved an 80% reduction in recurring support tickets, directly improving platform reliability for 186 branches.
- Root Cause Analysis: Transitioned from rapid "patching" to permanent issue resolution, ensuring long-term system stability and reducing technical debt within the USP ecosystem.

FIGMA PROJECTS

UI/UX Designs

- [Taiku Project](#) – A Figma Web Design that features an E-commerce web application for Sports apparel and accessories.
- [MizuMizu](#) – A High-Fidelity Prototype that features a mobile E-commerce application for fish and terrariums.

EDUCATION

DE LA SALLE UNIVERSITY

Bachelor of Science in Information Technology

Degree obtained October 2023

- Special Award: Capstone Model Documentation Awards, 2023
